

Day of Action for Climate Justice

**10 Year
Anniversary
of Seattle WTO
Shutdown**

A week before the Copenhagen UN Climate negotiations join us to push back the climate polluting corporations, financiers and lobbyists that push the US government to obstruct real, just, science-based climate change solutions, promote false solutions and undermine any real progress in US climate legislation and at the Copenhagen negotiations.

Take the day off, get together with friends and community, and join a regional demonstration or organize a local protest or nonviolent civil disobedience action.

**Our Climate!
Not Your
Business.**
